## PROFESSIONAL SUMMARY

Motivated Computer Science student with a strong foundation in programming and web development. Interested in building scalable, user-focused web applications and solving real-world problems through software development. Seeking an entry-level Full-Stack Developer role to apply my skills, gain industry experience, and grow as a software developer.

## EDUCATION

|                                                                                                                                       |                                                        |

## TECHNICAL SKILLS

**Programming & Querying:** Java, JavaScript, SQL  
**Backend:** Node.js, Express.js, RESTful APIs  
**Databases:** MySQL, MongoDB  
**CS Fundamentals:** Data Structure and Algorithms, OPPs  
**Tools & IDEs:** Git, GitHub

## TECHNICAL PROJECTS

### RYDEX – Smart Vehicle Booking & Ride Management Platform

- [React](#) · [TypeScript](#) · [MongoDB](#) · [NextAuth](#) · [Socket.IO](#) · [Geoapify API](#) · [Razorpay](#) · [Cloudinary](#)
- Built a full-stack vehicle booking platform featuring secure authentication, driver onboarding, admin approval workflows, real-time communication, and Razorpay payment integration.

### AI-Powered Virtual Voice Assistant

- [MERN stack](#) · [NextAuth](#) · [Google Gemini API](#)
- Developed a full-stack AI-powered voice assistant using React.js, Node.js, Express.js, MongoDB, and Google Gemini API. Implemented speech recognition and voice interaction using the Web Speech API, along with user authentication, conversation history, and personalized assistant settings.

## WORK EXPERIENCE & INTERNSHIPS

### Industrial Trainee - IBM

(Aug 2026 - Present)

- Working on a full-stack Machine Learning project, gaining hands-on experience in application development, backend integration, databases, and ML implementation.

### Artificial Intelligence Intern - Samsung Innovation Campus

(Sep 2025 - Nov 2025)

- Completed intensive training in Artificial Intelligence and Machine Learning. Built ML-based solutions and was selected for the Samsung AI Hackathon based on performance.

## HACKATHONS & WORKSHOPS

### Smart India Hackathon (SIH) 2025

- Developed an AI-powered tourism platform for Sikkim as part of a 3-member team, featuring AI-based trip planning, cost estimation, interactive maps, and offline navigation.

### Nexathon 48-Hour Hackathon

- Developed an AI-powered Digital Library Management System in a 3-member team within 48 hours, featuring intelligent document search and AI-assisted library management.

### Samsung AI Hackathon

- Developed a web-based vaccine reminder system to help parents track their children's vaccination schedules and receive timely notifications for upcoming doses.

### IBM Technovate Workshop

- Developed and deployed an AI chatbot using **IBM Watson** and integrated it into a live web application.

## CERTIFICATIONS

Artificial Intelligence Student Innovation Campus Training Certificate - Samsung Innovation Campus  
IOT Enabled Robotics Certificate - XROBOTICS  
Bootcamp on Big Data & Data Science Completion Certificate - NIELT Kolkata  
Artificial Intelligence & Deep Learning Course Completion Certificate - Infosys Springboard
